
Current Position

2013— J. David Gladstone Institutes at UCSF
Bioinformatics Fellow, Prof. Katherine S. Pollard Lab

Academic History

2012—13 **Lewis-Sigler Institute for Integrative Genomics, Princeton University**
Postdoctoral Fellow, Prof. Olga G. Troyanskaya Lab

2005—12 **Dept. of Molecular Biology, Princeton University**
Ph.D. in Molecular Biology, Specialization in Quantitative and Computational Biology
Thesis: Inferring Metabolic Regulation from High-Throughput Data
Advisors: Prof. Joshua D. Rabinowitz, Prof. Olga G. Troyanskaya
Committee: Prof. Ned S. Wingreen, Prof. David Botstein

2005 **Dept. of Biology, Harvard College**
A.B. in Biology

Peer-Reviewed Publications

9. Patrick H. Bradley, Matthew Brauer, Olga Troyanskaya, Joshua D. Rabinowitz. “Coordinated concentration changes of transcripts and metabolites in *Saccharomyces cerevisiae*.” *PLOS Comput Biol*, 2009; 5(1): e1000270.*,[†]

* First author; [†] open-access (OA) article, OA-only journal; [‡] OA article, hybrid-OA journal

Note: As someone who believes that the global scientific community benefits from access to publicly-funded research, I have chosen to publish first-author papers exclusively in journals with unembargoed open access options. I am also a signatory of “The Cost of Knowledge” boycott of Elsevier (including Cell Press). Since 2017, for all submitted manuscripts in which I am first author, I have also deposited preprints into bioRxiv.

Manuscripts In Review

1. Patrick H. Bradley, Katherine S. Pollard. “*phylogenize*: correcting for phylogeny reveals genes associated with microbial distributions.” Minor revisions at *Bioinformatics*. Preprint at <https://doi.org/10.1101/425231>.

Manuscripts In Preparation

1. Peter Spanogiannopoulos, Patrick H. Bradley, Jonathan Melamed, Ysabella Noelle A. Malig, Roy R. Gerona, Katherine S. Pollard, and Peter J. Turnbaugh. “Drug resistant gut bacteria mimic a host mechanism for anticancer drug clearance.”

Invited Talks and Seminars

- 2019 Dept. of Biology, Syracuse University, Syracuse, NY.
- 2018 Dept. of Biological Sciences, Lehigh University, Bethlehem, PA.
- 2018 Dept. of Microbiology and Immunology, Geisel School of Medicine, Dartmouth University, Hanover, NH.
- 2018 Analysis of Multimodal Cohort Datasets Workshop, Chan-Zuckerberg Initiative, San Francisco, CA.
- 2017 UCSF Diabetes & Obesity Retreat, Santa Cruz, CA.
- 2017 Dartmouth Lung Biology Center, Dartmouth University, Hanover, NH.

Contributed Conference Talks

- 2017 Second Workshop on Statistical and Algorithmic Challenges in Microbiome Data Analysis. Simons Center for Data Analysis and MIT Center for Microbiome Informatics and Therapeutics, Boston, MA.
- 2015 Probabilistic Modeling for Genomics. Cold Spring Harbor, NY.
- 2014 Keystone Meeting on Exploiting and Understanding Chemical Biotransformations in the Human Microbiome. Big Sky, MT.
- 2009 Highlights Track, Intelligent Systems for Molecular Biology (ISMB). Stockholm, Sweden.
- 2008 Databases and Computation Tools workshop, Yeast Genetics and Molecular Biology Meeting. Toronto, CA.

Awards and Honors

- 2018 Gladstone Above and Beyond Award
- 2017 Gladstone Convergence Zone Awards of Excellence: Leadership Award
- 2009 Intelligent Systems for Molecular Biology (ISMB) Travel Fellowship: Stockholm, Sweden
- 2008 Intelligent Systems for Molecular Biology (ISMB) Travel Fellowship: Toronto, ON, Canada
- 2006 NSF Graduate Research Fellowship Program, honorable mention
- 2004 Harvard College Research Program (HCRP) grant
- 2003 University of Vermont Summer Undergraduate Research Experience (SURE) grant
- 2001 National Merit Scholarship

Mentoring Experience

- 2016 Supervised summer undergraduate intern, Pollard lab, Gladstone Institutes. Project: predicting disease status with taxonomic and functional information.
- 2014 Supervised summer undergraduate intern, Pollard lab, Gladstone Institutes. Project: detecting spatial organization of environmental microbes and microbial gene functions. Both interns were recruited through the PUMAS (Promoting Underrepresented Minorities Advancing in the Sciences) program at the Gladstone Institutes.
- 2010 Supervised two rotation students in the Quantitative and Computational Biology program at Princeton University. Project: integrating structural similarity into gene function prediction pipelines.

- 2010 Supervised summer undergraduate intern, Rabinowitz lab, Princeton University. Project: comparative analysis of pathway regulation in yeast and *E. coli*.
- 2009 Supervised summer undergraduate intern, Rabinowitz lab, Princeton University. Project: finding patterns in transcriptional and metabolic regulation in yeast.

Teaching Experience

- 2018, '19 Invited lecturer, "The Human Microbiome" mini-course.
Lectured on analyzing shotgun metagenomics data to UCSF graduate students, then led a bioinformatics lab in which students analyzed and visualized shotgun data from a case-control study of the inflammatory bowel disease gut microbiome.
- 2017–19 Invited lecturer, "Computational Immunology" mini-course.
Introduced computational techniques for the analysis of metagenomic sequencing data to UCSF graduate students.
- 2017 Discussion leader, "Computational Immunology" mini-course.
Led discussion section on selected papers in the field of data analysis for the microbiome.
- 2008–09 Assistant in instruction, "Experimental Project Laboratory in Quantitative and Computational Biology."
Co-supervised undergraduates undertaking independent, self-directed research projects on the genetics of aging in *C. elegans*. Lectured on epistasis and statistical data analysis.
- 2006–07 Assistant in instruction, "An Integrated, Quantitative Introduction to the Natural Sciences III."
Led precepts (weekly lecture/discussion sections) and problem sessions (weekly mandatory office hours) on topics in biochemistry, organic chemistry, molecular biology and genetics.

Academic Service

- 2018 Moderator, "Out In Science" panel discussion.
Led discussion centering on issues of representation, equity, and the intersection of multiple identities for LGBTQ scientists.
- 2018– Founding member, Gladstone LGBTQ+ Association. Contributed to events centered on diversity and inclusion, including "Trans Visibility in the Sciences."
- 2016– Co-organizer and presenter, statistics club (Gladstone Institutes).
Co-organized and presented at biweekly reading group on advanced methods in biostatistics, covering probabilistic graphical models and non-parametric Bayesian methods.
- 2014– Member, UCSF Graduate Queer Association.
Planned social and professional events for LGBTQ scientists at UCSF and the Gladstone Institutes, including invited talks and "Out In Science" panel discussions.
- 2008 Co-organizer and presenter, statistics self-study group (Princeton University).

REFEREE FOR THE FOLLOWING JOURNALS:

- 2018 *GigaScience*
- 2017–19 *Microbiome* (3 manuscripts reviewed)
- 2017 *PLOS Computational Biology*
- 2011 *Biophysica et Biochemica Acta: General Subjects*
- 2007–19 *Bioinformatics* (25 manuscripts reviewed)

CO-REFEREE FOR THE FOLLOWING JOURNALS:

- 2017 *Nature Microbiology*
- 2017 *Science*
- 2016 *PLOS ONE*
- 2011 *PLOS Computational Biology*
- 2010 *Genome Biology*
